## **Sundial TSL01**

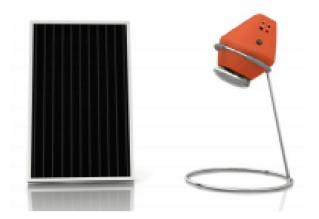

Trony Solar Holding Co., Ltd.

Results based on test procedures detailed in IEC 62257-9-5, ed. 2.0

Verify Online: www.lightingglobal.org/products/tr-tsl01

Valid Until: January 31, 2017

Meets Lighting Global Minimum Quality Standards

**Mobile Charging** 

1 Light Point

## **Warranty Information**

A 2-year warranty

| Performance Details                                       |                       |             |
|-----------------------------------------------------------|-----------------------|-------------|
|                                                           | Brightness Setting*** |             |
| Performance Measure                                       | High                  | Medium-High |
| Full battery run time* (hours)                            | 2.6                   | 6.4         |
| Run time per day of solar charging* (hours)               | 2.6                   | 6.3         |
| Total light output (lumens)                               | 140                   | 85          |
| Total area with illumination > 50 lux** (m <sup>2</sup> ) | 0.94                  |             |
| Total lighting service (lumen-hours / solar-day)          | 360                   | 540         |

<sup>\*</sup> Run time estimates do not account for mobile phone charging or other auxiliary loads; the run time is defined as the time until the output is 70% of the initial, stabilized output.

<sup>\*\*\*</sup> Additional brightness settings (not tested): Medium-Low, Low

| Lighting Details            |                                                |
|-----------------------------|------------------------------------------------|
| Lamp type                   | LED                                            |
| Description of light points | Single LED                                     |
| Colour characteristics      | CRI 66                                         |
|                             | CCT "Cool" (5000-7000 K)                       |
| Distribution type           | Wide                                           |
| Lumen maintenance           | 91% of the original output remains after 2,000 |
|                             | hours run time                                 |

<sup>\*\*</sup> Total area with illumination > 50 lux is determined by the maximum area with adequate illumination at a 0.75 m distance and at the distance from which the product would normally provide task lighting service.

| Special Features                            |                                                                                                              |  |
|---------------------------------------------|--------------------------------------------------------------------------------------------------------------|--|
| Mobile charging                             | Auxiliary power (310 mA at 4.25 VDC, mini-USB connector) with 4 adapters to charge mobile phone from battery |  |
| Lamp housing                                | Polycarbonate                                                                                                |  |
